### REQUEST FOR COUNCIL ACTION

MEETING

335

DATE:

2/19/03

AGENDA SECTION: PUBLIC HE	EARINGS	ORIGINATING DEPT: Public Works	ITEM NO. E- 18
Hearing: Sanitary Sewer and Wa Subdivision Area, J9790		termain to Serve the Cedar Park	PREPARED BY:
			71

This is a Hearing to consider the following local improvement project:

#### Project No. M1-29, J9790

"Sanitary Sewer and Watermain Extension to Serve the Cedar Park Subdivision Area."

The estimated construction costs and expense of this project are as follows:

Sanitary Sewer and Watermain	\$ 281,768
Service Connections	18,462
Restoration	74,570
Sub-Total	\$ 374,800
Engineering/Interest/Contingencies	112,440
Total Estimated Project Cost	\$ 487,240

The Cedar Park Subdivision extension project is included in the 2003 Capital Budget.

The Cedar Park Area is included in Orderly Annexation Agreement #3 between Marion Township and the City of Rochester. Annexation of the Cedar Park area will occur no sooner than January 1<sup>st</sup> of the year 5 years after a sanitary sewer and watermain extension project is substantially completed to serve the Area.

The project is proposed to be funded from Sewer and Water Connection Charges (Utility Connection Agreements), Sales Tax Revenue appropriated to the Water Quality Protection Program, RPU share for oversize watermain costs and Marion Road SE crossing, project cost transfers to J9598 Marion Trunkline Sanitary Sewer and J9604 SE Area Trunk Watermain, and future Watermain Connection Charges.

#### **COUNCIL ACTION REQUESTED:**

If the City Council wishes to proceed a resolution could be adopted authorizing the project to be made. Since the Cedar Park Area project was petitioned by 50% of the owners of property affected by the project a simple majority vote of the Council is required for adoption.

COUNCIL ACTION: Motion by:	Second by:	to:

# REPORT ON THE FEASIBILITY OF PROPOSED LOCAL IMPROVEMENT PROJECT

### TO SERVE THE CEDAR PARK SUBD. AREA.

January 22, 2003

Honorable Mayor & Common Council City of Rochester, Minnesota

A petition for sanitary sewer and watermain to serve the Cedar Park Subdivision Area was forwarded by the City Council at their meeting of June 29, 1999 to the Public Works Department for the preparation of a Feasibility Report. The petition was checked and found to be in proper form and was signed by 3 of 6 property owners of lots containing a single-family residential dwelling. That represents 50.0% of the single-family residential lots within the Cedar Park Subdivision Area that are eligible to participate in the City of Rochester, Water Quality Protection Program (WQPP) adopted by the City Council on December 21, 1999.

The WQPP Project Manager received a verbal request by one owner of developed commercial property located along Marion Road SE that they desire to have their property included in the Cedar Park project. With this request 4 of 7 property owners of lots containing a single-family residential dwelling or a developed commercial lot request a sewer and water extension project to serve the Cedar Park area. That represents 57.1% of the developed lots within the Cedar Park area that are eligible to participate in the WQPP.

In addition the proposed Cedar Park project can provide city sewer and water to 9 undeveloped single-family residential lots that are located in the Cedar Park area.

#### Feasibility Report

We report that the above referenced project is feasible and recommend its construction. The location of this project is within an area of existing single-family residential development and existing commercial development that currently lacks public sanitary sewer and watermain. A majority of the septic systems and wells within the Area were constructed prior to the State of Minnesota and Olmsted County having any requirements or standards for construction of septic systems and wells. The lots are typically under ½ acre in size and are unable to absorb the nitrates created from the septic systems. There is an increasing threat of contamination to the City of Rochester's ground water supply as the existing septic systems and wells begin to fail. This project would allow property owners of lots containing existing single-family residential dwellings and developed commercial lots to connect to public sanitary sewer and water systems rather than replacing their old systems when they fail. This project also allows the undeveloped single-family residential lots and undeveloped commercial lots to develop with public sewer and watermain

The costs of this project are proposed to be recovered through Sanitary Sewer and Watermain Connection Charges (Utility Connection Agreements), future charges to undeveloped land that is located adjacent to the project, RPU share for oversize watermain costs and Marion Road SE crossing, project cost transfers to J9598 Marion Road Trunkline Sanitary Sewer and J9604 SE Area Trunk Watermain, and Sales Tax Revenue appropriated to the City of Rochester, Water Quality Protection Program.

The proposed project consists of the installation of an 8-inch sanitary sewer lines, 8-inch and 12-inch watermain lines, and sanitary sewer and water service connections throughout the Cedar Park Subdivision Area.

City sanitary sewer will be extended to a location approximately 200 feet south of the intersection of Marion Road SE and Pearl Court SE in the Spring of 2003. Sanitary sewer will be extended from that location to serve the Cedar Park area. A sanitary sewer crossing of Marion Road is required.

Trunk watermain is currently located at the intersection of 30<sup>th</sup> Avenue and Marion Road SE. Trunk watermain is scheduled to be extended from that location in the Spring of 2003 to serve the Cedar Park Area and other subdivisions in Marion Township that are located between 30<sup>th</sup> Avenue and the Cedar Park Subdivision area that have requested the extension of city sanitary sewer and watermain through the City of Rochester Water Quality Protection Program Area.

#### Applicable Connection Charge Rates and per Lot Caps

The Cedar park Subdivision Area petition was received on June 29, 1999. On August 1<sup>st</sup> of each year the Water Quality Protection Program rates and per lot caps were adjusted by the change in the Engineering News Record Construction Cost Index as measured in the Minneapolis/St. Paul area during the preceding 12-months, the Department of Public Works recommends that the sanitary sewer and watermain connection charges for this project be based on the connection charge rates and per lot caps in affect at the time the petition was received by the City as follows:

- Maximum sanitary sewer and water connection charge rate of \$66.30 per foot of frontage.
- Maximum sewer and water connection charge per lot cap for a developed lot that contains a
  habitable single family dwelling unit shall be as follows:
  - 1) maximum \$8,160 per lot for any developed lot 1/2 acre or less.
  - 2) \$8,160 per lot, plus \$0.19 per square foot for any developed lot greater than  $\frac{1}{2}$  acre up to 1-1/2 acre.
  - 3) maximum \$16,320 per lot for any developed lot 1-1/2 acre or larger.

# The estimated construction costs and expenses of the project made without completed plans or survey are as follows:

Sanitary Sewer and Watermain Sewer Service Connection Stub-Outs Water Service Connection Stub-out Restoration	\$750 per service x 16 services \$750 per service x 16 services	\$ . \$ \$ \$	366,299 12,000 12,000 96,941
Estimated Cost of the Project		\$	487,240

### The estimated project costs are proposed to be funded as follows:

Utility Connection Agreements RPU Share for Oversize Watermain and Marion Road SE Crossing Trunkline Sanitary Sewer Costs (Transfer to J9598)	\$ \$ \$	119,369 55,543 26,323
Future Watermain Connection Charges Trunk Watermain Costs (Transfer to J9604)	\$ \$	,
Sales Tax Revenue (see below)		164,505
Estimated Project Costs	•	487,240

#### Amount of sales tax revenue required for the Project:

Sales Tax (Rate Cap and per Lot Cap)	\$ 154,005
Sales Tax (Sewer Service Stub-Out Allowances) 7 services x \$750/serv.	\$ 5,250
Sales Tax (Water Service Stub-Out Allowances) 7 services x \$750/serv.	\$ 5,250
Estimated Amount of Sales Tax Funding Required for Construction of Project	\$ 164,505
Estimated additional sales tax revenue required for work on private property	

Of the 15 lots within the project area 7 lots contain a single-family residential dwelling or an existing commercial structure. These lots are eligible for *Allowances* through the Water Quality Protection Program as follows:

Sewer Service Lateral	7 lots x \$1,000 per lot	\$	7,000
Water Service Lateral	7 lots x \$1,000 per lot	\$	7,000
Well Closure	7 lots x \$1,100 per lot	\$	7,000
Septic Closure	7 lots x \$ 500 per lot	<u>\$_</u>	3,500
	ales Tax Revenue Required for Allowances for Work on	\$	24,500
Private Property			

### Estimated sales tax revenue required for construction of Project and Allowances

Estimated Amount Sales Tax Revenue for Construction of the Project	\$ 164,505
Estimated Amount of Sales Tax Revenue Required for Allowances	<b>\$</b> 24,500
Estimated Amount of Sales Tax Revenue Required for Construction of the Project	\$ 189,005
and Allowances for Work on Private Property	

We recommend that the necessary funding to construct sanitary sewer, watermain and service connections in the Cedar Park Subdivision Area be done so in accordance with the City of Rochester's existing sanitary sewer and watermain connection charge policies and the Water Quality Protection Program. Property owners that desire to participate in the Water Quality Protection Program and the benefits contained therein, are required to:

- 1. Enter into a Utility Connection Agreement with the City within three (3) years of the date the City initiates the project.
- 2. Connect the existing single-family residential dwelling or existing developed commercial property to the public sewer and water systems within five (5) years of the date of project initiation.
- 3. Consent to annexation of their property consistent with the conditions of an Orderly Annexation Agreement between the City and Marion Township.

Submitted for your consideration:

James M. Lochr

Water Quality Protection Program

Project Manager

Richard W. Freese, P.E. Director of Public Works
